

# JLG® COMPACT CRAWLERS

**JLG**®

JLG® Compact Crawler Series

# REACHING OUT

Introducing the range of compact crawler boom lifts from JLG, specialists in off-slab and uneven terrain.

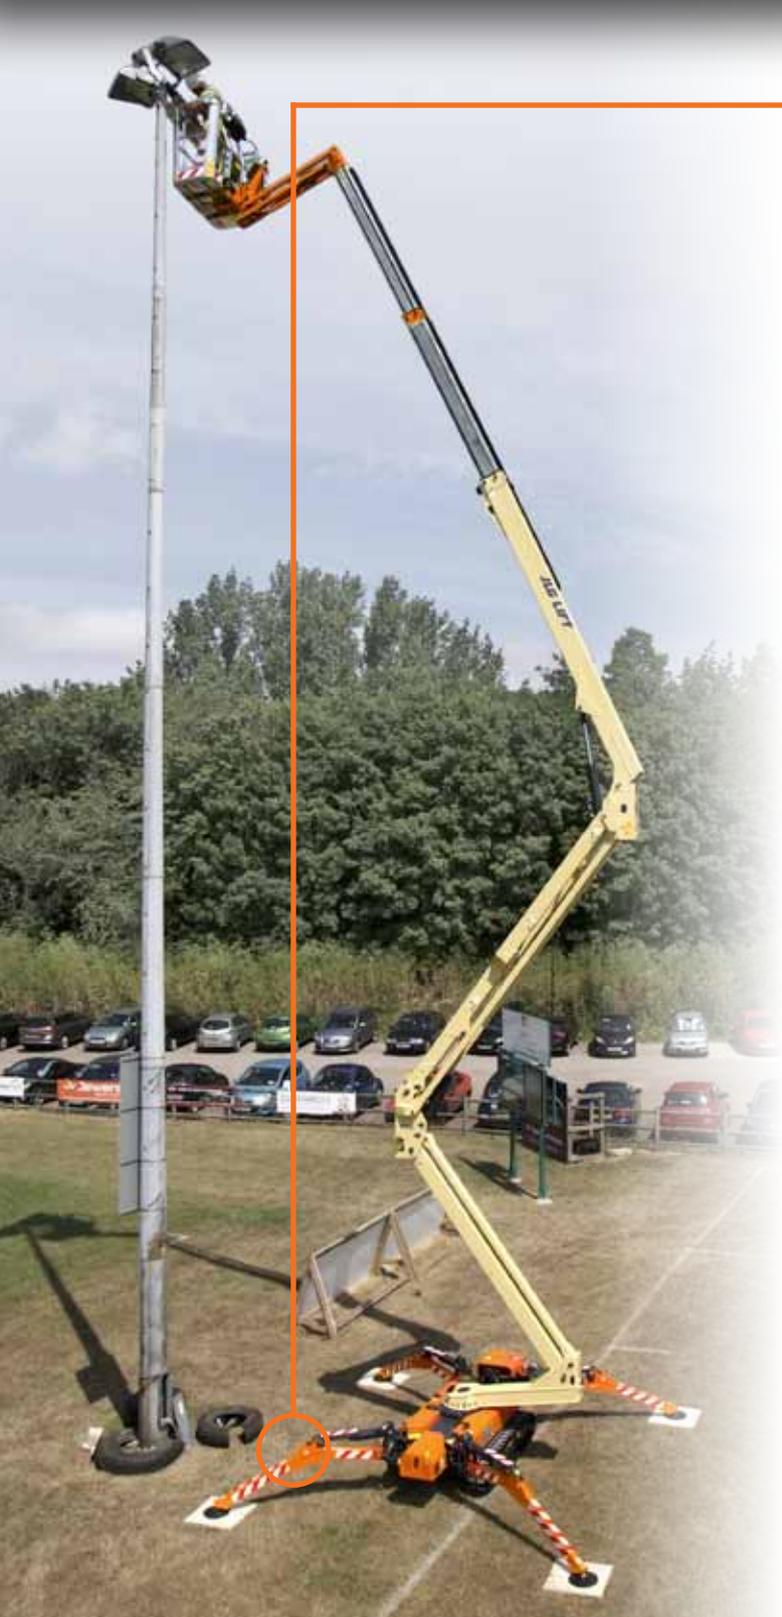

The JLG X-Series compact crawler boom lifts feature tracked wheel carriages that climb steps and a narrow chassis for access through gates, yards and doorways. Working heights range from 17m to 26m – Platform Capacities come with standard 230 kgs on all models, except for the X23J, which comes in dual capacities of 120/200 kgs.

JLG Compact Crawlers are low weight and can be operated via an engine as well as electrically. This makes them extremely versatile, whether working indoors or out.

**YOUR MOBILE, LOW WEIGHT  
TOOL FOR OVERHEAD WORK**

## SPECIALIST DESIGN

Whatever the task, JLG X-Series excel at multi-purpose application. JLG X-Series can go almost anywhere, the near square outrigger pattern helps provide additional stability, whilst the standard removable outrigger pads help minimize the impact to sensitive areas. The crawler carriage gives the X-Series its terrain ability, allowing it to climb grades up to 40%.

### SPECIALIST DESIGN:

- Standard removable outrigger pads
- Extendable undercarriage
- Operating slope max. 11° (X23J up to 13°)
- Flexible positioning of outriggers (X23J)

### TYPICAL AREAS OF APPLICATION:

- Gardening and landscaping
- Cleaning and maintenance
- Light construction
- Inspection and renovation work

### Gradeability

Operating slope max. 11°  
(X23J up to 13°).

### Specialist Design

Standard removable outrigger pads and basket. Extendable undercarriage provides additional stability during transport.

## EXCEPTIONAL FLEXIBILITY

The JLG X-Series are equipped as standard with an electric motor, an ideal solution when working indoor – as no noise or emissions are created. The engine (choice petrol or diesel) is mounted at the rear, as far away from the operator as possible. Optional 'zero maintenance' lithium batteries are available.

Three models from the JLG X-Series – the X15J Plus, the X20J Plus and the X26J Plus – allow for 230kg platform capacity, increasing productivity by permitting to bring additional tools into the basket, without restricting the work envelope.

### Flexibility

Several engine options available. All crawlers are equipped as standard with AC electric motor (110V/220V). Optional lithium batteries available.

### Model Range

4 Models with standard 230 kgs of platform capacity (X15JP, X17JP, X20JP, X26JP) and 1 model with dual capacity of 120/200 kgs (X23J).

## GREATER ACCESSIBILITY

JLG X-Series compact crawler boom lifts deliver improved access in a multitude of ways. A narrow base and a low ground bearing pressure allow for travel on sensitive or uneven ground, and give access to areas where conventional machines are excluded because of physical size. All models are equipped with a remote drive control function and can be operated from the basket as well as remotely during transport when manoeuvring through confined space or loading/offloading. Thanks to the auto-leveling function, setting or retracting the outriggers is done automatically with ease.

### GREATER ACCESSIBILITY:

- Low ground bearing pressure provides access to sensitive areas
- Narrow base allows for access to confined spaces
- Non-continuous swing of 361° for additional flexibility in positioning the product
- Optional non-marking tracks available

<b>Dimensions</b>	
Working Height w 120 kg capacity	23.10 m
Working Height w 200 kg capacity	21.70 m
Horizontal Outreach (Std Platform w 120kg)	11.13 m
Horizontal Outreach (Std Platform w 200kg)	9.75 m
Platform size (standard 2 persons)	0.69 m x 1.30 m
Stowed width (without platform)	0.99 m
Stowed height (on tracks)	1.99 m
Stowed length (on tracks)	6 m
Outrigger footprint	3.98 m x 3.98 m
Machine weight (with standard platform)	2,990 kg
Operating weight (with petrol engine)	3,100 Kg
AC electric motor	110V or 220V, 50Hz, 2.2kW
Engine	Honda iGX440, 11 kw Petrol

**MAIN FEATURES**

- Compact dimensions and low weight
- Low ground bearing pressure
- 361° non-continuous swing
- Load sensing under the Platform
- Standard auto-stabilisation
- Working indoor and out
