

## Orbital pipe cutting machine

### The planetary pipe cutter has the following advantages:

1. The planetary pipe cutting machine, which comes from the international top technology, fills the gap in China and is exported to South China Ten countries in North America, Europe and Southeast Asia
2. The market share of the planetary pipe cutter is the first in the domestic similar machinery (including imported brands).
3. The cutting speed can be adjusted according to the material of the cut pipe, for example, low speed is used for stainless steel pipe
4. The blade of the planetary pipe cutter cuts in from the inside out only at the best position.
5. The planet type pipe cutter can change the blade quickly, and the blade can be used for the imported similar pipe cutter.
6. It is the best choice for direct welding of stainless steel pipe after cutting.
7. When cutting the pipe, clamp the pipe at multiple points.
8. The pipe diameter adjustment of pipe cutting is fast and can be completed in a few seconds.

### Operation procedure:

The cutting dike is driven by a 1600 watt motor by rotating the machine 360 degrees by hand to cut the pipe  
 Round tooth blade cutting. The pipe was cut off after a 360 degree rotation. The powerful and stable motor is equipped with 6 speeds are available.

H-120

### Specification

Model	H120	H182	H230	H325
Pipe OD	1.5"-4.5"	3"-6"	6"-9"	8.5"-12.5"
	20-120mm	85-182mm	150-230mm	215-325
Wall Thickness	0.04"-0.22"	0.08"-0.4"	0.08"-0.4"	0.08"-0.4"
	1-7mm	2-10mm	2-10mm	2-10mm
Motor Blade RPM	1600w	1600w	1600w	1600w
	150-250	150-250	150-250	150-250
V/Hz	110/220v 50/60Hz	110/220v 50/60Hz	110/220v 50/60Hz	110/220v 50/60Hz
Net Weight	75kg	90kg	110kg	130kg
	165lb	198lb	242lb	286lb
Application	Thin-wall stiness-steel tubes Stainless steel pipes Low and unalloyed steel Casting materials, non-ferrou metal Copper , alum nm and diastic pipes
